

ALPO GT M Soya

Waterless Sheetfed Offset Process Ink

❖ **Features**

- Formulated to run on Direct Image presses using waterless plates.
- Will not dry on press during the imaging process.
- Is a soy oil based ink and the Soy Seal can be used on jobs printed with the Alpo GT M Soya inks
- Excellent ink transfer even at low temperatures, because of a good balance between ink flow and viscosity resulting in the largest window of runnability without toning of any waterless DI ink.
- Excellent ink setting time.
- The New ALPO G QMDI is a medium tack ink that allows for improved trapping and dot structures.
- Faster start ups which mean less paper waste.

* All information is based on results from experience and tests according to the testing method of T&K Toka and is believed to be accurate; however, there are not any standard values. Since T&K Toka cannot know all of the many different uses its product may be put, or the condition of use, T&K Toka does not make any warranty, either written or implied. Before a job is printed, you should thoroughly pretest the ink to be sure it does suit your requirements. The ink may be reformulated for improvement without any prior notice. Suggestions of uses should not be taken at inducements to infringe any patents. Please refer to the MSDS for additional information.
